

Canon will plant 10 trees in your honor every time you purchase a Canon Factory Certified Series model!

Leave a green footprint on the Earth for the benefit of future generations.

Every time a customer purchases a Factory-Certified imageRUNNER 3300E/3300EN or imageRUNNER 5000E/5000EN model, Canon will make a donation to plant 10 trees through the Arbor Day Foundation in one of the United States National Forests. Customers will also receive a certificate recognizing the donation.

Canon Factory Certified Series models are produced at our US-based manufacturing facility in Newport News, Virginia as part of our Remanufacturing Program. Our Remanufacturing Program is an extension of our comprehensive commitment to environmental responsibility across the entire product lifecycle – aiming to limit our impact on the environment by extending the lives of our products, and conserving natural resources through reliable, high-quality remanufactured office equipment.

Each tree planted helps add new life in areas where trees have been lost, enriching the land, providing vital wildlife habitat, protecting soil and waterways.

For more information on this program, please contact your local Canon Authorized Dealership.
